

Job Application Reports Suite — Report Types Use Case

Aim:

To design and build a complete suite of Reports in Zoho Creator for the "Job Application Form" application, demonstrating the correct usage of all nine Report Types available in Zoho Creator to empower HR, hiring managers, and leadership with multi-perspective candidate data visualization and management.

Reports Used Overview

Report Type	Report Name	Purpose / Key Configuration
List View	All_Applications_List	Provides a simple, scrollable list of every application with key columns for quick browsing, search, and descending chronological sorting.
Spreadsheet View	Applications_Spreadsheet	Offers an editable, grid-style layout for HR to bulk-update screening statuses, interview rounds, and assigned interviewers.
Kanban View	Application_Status_Kanban	Displays applications as draggable cards grouped by pipeline stages (Applied, Screening, Interview, Offer, Rejected).
Calendar View	Interview_Schedule_Calendar	Plots applications based on scheduled interview dates to help

		interview panels plan their daily schedules.
Map View	Candidate_Location_Map	Plots candidates' current addresses on a map, enabling HR to analyze geographic reach and relocation requirements.
Timeline View	Application_Activity_Timeline	Displays application submissions along a weekly time axis to monitor applicant flow across hiring campaigns.
Pivot Table	Department_By_EmploymentType_Pivot	Cross-tabulates departments against preferred employment types to show the mix of full-time, part-time, and intern applicants.
Chart View	Department_Applications_Chart	Visualizes application counts per department via an interactive bar chart to track role popularity and resource allocation.
Summary View	Department_Wise_Summary	Groups and summarizes applications by department, providing counts and average years of experience for

		pipeline health checks.
--	--	-------------------------

Detailed Report Descriptions

1. *All_Applications_List (List View)*

- **Purpose:** Serves as the default landing report for the HR team, displaying every candidate application in a flat, searchable tabular view.
- **Features:** Includes global search options, column-level filters for departments and employment types, and sorting by submission date (descending).

2. *Applications_Spreadsheet (Spreadsheet View)*

- **Purpose:** Used daily by HR officers to review and update candidate records quickly in an Excel-like grid layout.
- **Features:** Features inline editing restricted strictly to screening and interview fields, keeping baseline applicant data read-only to ensure data integrity.

3. *Application_Status_Kanban (Kanban View)*

- **Purpose:** Provides a visual pipeline for tracking how candidates transition through various recruitment phases.
- **Features:** Allows drag-and-drop card movement across status columns, which automatically updates the underlying database status field with timestamps.

4. *Interview_Schedule_Calendar (Calendar View)*

- **Purpose:** Used by interview panels to monitor daily interview commitments and prepare accordingly.
- **Features:** Provides month, week, and day grid views with drill-down capabilities into specific candidate schedules for the selected date.

5. *Candidate_Location_Map (Map View)*

- **Purpose:** Deployed by the regional recruiting team to visualize applicant geographic distribution.
- **Features:** Geocode-enabled pin placement colored by department to help evaluate local talent density versus relocation needs.

6. *Application_Activity_Timeline (Timeline View)*

- **Purpose:** Enables HR to track applicant flow velocity and campaign buildup over time.
- **Features:** Chronological breakdown highlighting peak submission weeks to optimize marketing and job posting efforts.

7. *Department_By_EmploymentType_Pivot (Pivot Table)*

- **Purpose:** Summarizes the intersection of target departments and candidate employment preferences (full-time, part-time, internship).
- **Features:** Displays clear matrix totals and zero-filled cells to avoid ambiguity during internal reviews.

8. *Department_Applications_Chart (Chart View)*

- **Purpose:** Visually compares application volumes across different departments to identify high-interest roles.
- **Features:** Dynamic bar chart layout with auto-refresh capabilities whenever new candidate entries are submitted.
